

I object to the invasion of my privacy. My phone is for MY CONVENIENCE, that I choose to have and pay for. I have an unlisted number and am on the NYS, do not call list and still receive calls. I mostly receive automated calls. I receive more calls now that I am on the do not call list than before. There should not be a do not call list, it should be a DO CALL LIST. Those who want the annoyance should request it, while those of us who strongly object should not have to fight for years to have these INTRUDERS, these destroyers of the tranquility of the home STOPPED! If you can not get peace in your own home...! Why are business, charities, anyone given the right to use MY PHONE, invade MY HOME. Let them find an alternate way to make money. They should be given permission by me to use my number, just as I have the right to give my number to WHOM I CHOOSE, "they" should not allow them to take away my right to privacy, and I strongly object to the FCC allowing them to do so. Again, I want no junk mail or annoying calls and they should not be forced on me.
